# Energy Depot for Homes

## *Residential Customer Energy Information System*

***Energy Depot was developed in 1996 and offered the first web-based home energy audit software. The initial Energy Depot was an Internet application of Enercom's PC-based "EnerGraf®" software which had been used by utilities for 16 years to provide millions of home energy audits.***

***10 Years and Millions of  
Internet Energy Audits Later...***

- Suite of Integrated Online Energy Information Applications
- Choice of “Tools” to Meet Homeowners’ Energy Information Needs:
  - Energy Audit (Profile)
    - EZ Energy Audit
    - Full Energy Audit
  - Energy Calculator
  - Energy Comparison Tool (*Option*)
  - Energy Library
  - Energy Advisor

# Online Energy Tools
